

NIETZSCHE ARCHIVE

The interior design and furnishings of the Nietzsche Archive are numbered among Van de Velde's most successful creations. His design work included the new porch, the vestibule, the central library and collection room, a small study and a dining room. This ensemble has been almost completely preserved as an artistic masterpiece. Van de Velde designed not only the wooden fittings, but also the stoves, the furniture, the casements, the fabric covers, the lamps, the floor tiles and the ornamental vases which give the rooms harmonic atmosphere.
